DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Rejections set forth previously under this section are withdrawn.

Allowable Subject Matter

2. Claims 2-22, 24-26, and 28 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. Pyles (WO 03/083207) is the most pertinent reference to the claimed invention, but Pyles does not teach or fairly suggest the subject matter of Claim 22, namely treating a plastic article in the claimed manner, and then contacting the treated plastic article with a dye composition comprising at least one dye, thereby forming a treated and dyed plastic article. Pyles' process is a dyeing process, but does not teach or fairly suggest a process that would read on this claim by additionally providing a pretreatment step using the claimed process before the Pyles dyeing process. It should also be noted that the claimed process recites a step (b) of contacting at least a portion of the surface of the plastic article with a treatment consisting of components (i), (ii), and (iii). Any attempt to modify the Pyles process to exclude a dye would destroy the objective of the Pyles reference, which expressly requires a dye. See the abstract and Claim 1 of Pyles.
5. Pyles also does not teach or fairly suggest the subject matter of Claim 24, steps (e)-(g), or Claim 25, step (e) in combination with the other recited subject matter. Note also that both Claims recite a step (b) of contacting at least a portion of the surface of the plastic article with a treatment consisting of components (i), (ii), and (iii). Daughenbaugh was previously applied against Claim 24, but Daughenbaugh does not teach or fairly suggest the particular steps recited in steps (e)-(g) of Claim 24. Daughenbaugh teaches that a material is separated into organic and

aqueous fractions, and that the organic fraction is filtered through activated carbon, but does not teach or suggest forming a mixture of the claimed treatment composition with the particulate activated carbon, and isolating from the mixture a substantially additive-free liquid comprising water, the carrier, and the diol. Johnson (US 2302552) and Daughenbaugh were previously applied against Claim 25, but this rejection has been reconsidered and withdrawn. Johnson is not analogous, and Daughenbaugh does not teach or fairly suggest introducing the additive into the filter and passing the mixture over the additive and through the filter, thereby forming a treatment composition, and passing continuously the treatment composition through the filter.

6. Arguments on pages 8-12, especially pages 8-9, or the response filed 27 May 2008 were found persuasive and resulted in the withdrawal of claim rejections over Kawashima.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
